

HUNGERFORD HALL.—The theatres constructed here are now in full operation, and offer attractions to all sight-seers. In one, M. Langlois is exhibiting some capital "Conjuring," a very clever Indian juggler, and various optical illusions; and in the other, M. Lasseigne as a magnetizer, and Miss Prudence are astonishing all who see them. Whether this last exhibition be regarded as the most extraordinary juggling that was ever effected, or the display of most mysterious natural phenomena, it should be seen by all who are curious in such matters.

MARLBOROUGH LITERARY AND SCIENTIFIC INSTITUTION.—The new theatre, which we lately gave an account of, is in active use. The managers are going ahead with some spirit. On Thursday, 18th, a subscription concert was given, in which Misses Birch and Dolby, Mr. W. Harrison, and others appeared. We do think that whether the leading-inhabitants of a neighbourhood delight in the literary, the scientific, or the more strictly amusing or entertaining branches of such institutions, or in all three combined, they ought to give their substantial support to them for the sake of the others to whom they are most useful.

CHESTER ARCHITECTURAL SOCIETY.—The monthly meeting of this society was held on the 1st. The Marquis of Westminster presided; and the Rev. G. B. Blomfield gave a topographical description of the original and present arrangements of the abbey buildings of St. Werburgh's, Chester. In reference to some remarks of the lecturer on the state of MSS. and abbey deeds, the Rev. Wm. Massie took occasion to bring before the meeting the general subject of the county, city, and ecclesiastical records. Those of the city were, as heaps of parchment, in heaps of dust, and the others at least needed a more minute classification, by some person well qualified to make a digest and descriptive catalogue of them for easy reference. Mr. Ayrton then drew the attention of the meeting to the objectionable character of new gas lamps now erecting on the city gates, and submitted a letter, which was adopted, and ordered to be signed by the secretary for transmission to the mayor, pointing out that the design of these lamps is out of character with the gates on which they are being placed.

ILES'S PATENT MARBLE.—The scarcity of the choicest kinds of marble and the expense of working, necessarily renders this material very limited in its application. As a partial remedy for this, numerous attempts have been made to supply the demand by artificial manufacture, and notwithstanding a growing feeling against "imitations," will doubtless continue to be so. The "patent marble" now before us, manufactured upon new principles, gives a successful imitation of many kinds of rare marbles, and is said to be durable and cheap.

NEW TABLE OF CAB FARES.—A correspondent, J. F., suggests the formation of cab fare tables founded on the principle of the square, or somewhat like the common multiplication table, with names of places instead of the multipliers, and amounts of fare between the two in the place of the product. An immense number of fares could thus be condensed into a small space, and be made intelligible to every one who understood the ordinary multiplication table. Even this, however, unless as a previous check, might be superseded by the use of the track-dial, measuring the distance run over by the cab-wheel and pointing it out to every passenger. The only objection we can see to this latter, on the faith, of course, that it measures the ground with exactitude, is the power it might give the cabman to take roundabout routes, for the purpose of lengthening his course, or of clearing uncompleted miles. The table suggested by our correspondent might be a check in such a case, and, at all events, it would have the advantage, which the dial has not, of informing passengers beforehand what they will have to pay between any two given points. In cases of cross-running, however, from place to place in irregular transit here and there, the dial should decide.

MARGATE PIER COMPETITION.—As the surveyor to the directors of the Margate Pier and Harbour Company, I am in a position to give a distinct contradiction to a correspondent's remarks appearing in *THE BUILDER* of the 13th inst., relating to the competition for a new landing-place. The directors have no plan before them: when the question of a new landing-place was first raised, a plan was offered to them, which they declined to accept or consider, nor has it been brought before the directors in any way; and I am quite assured that their only object will be to select from the plans which may be submitted to them that which may seem best suited to their requirements, without reference to its author.—**WM. CAVELEY.**

WESTMINSTER BRIDGE.—As you are taking some interest in the proposed new bridge at Westminster, let us hope you will exercise your influence in deterring the public mind from a cheap bridge, more especially from the so-called cheap foundations as are now being exemplified at Rochester and elsewhere; and such as were advocated before a committee of the House of Commons last session upon Westminster-bridge. The failures which have taken place in the foundations of the present Westminster and Blackfriars bridges ought to be a salutary lesson against cheap foundations. With the examples of Smeaton, Rennie, and Telford before us, and the noble bridges of Waterloo, Southwark, and London, which decorate the metropolis, it would be to our eternal dishonour if any but the most solid bridge were erected at Westminster. It is to be hoped the architect will not forget to provide a railway on the new bridge to the central terminus in the City, as was proposed some little time since, as a branch to one of the railways on the other side of the river.—**A BUILDER.**

LITERARY AND SCIENTIFIC SOIREE AT NORTHAMPTON.—A grand soiree was held on Wednesday evening last, in the Corn Exchange, Northampton, to commemorate the opening of a new suite of buildings for the town and county Mechanics' Institute. There were nearly 800 persons present, including the principal resident nobility and gentry. Lord Fitzwilliam took the chair, and addressed the assembly, as did Mr. Layard, the traveller, in an interesting speech. Mr. Charles Knight, too, Mr. V. Smith, M.P., Mr. George Cruikshank, Lord Henley, Dr. Conolly, and other gentlemen, addressed the meeting.

CONDITION OF FLEET MARKET.—I am old enough to remember when Fleet Market, in Farringdon-street, now, was one of the most frequented spots in London. But, alas! the spot is wonderfully changed. Putting the market on one side of the same street (on the shelf), and building a row of houses in front, has as completely crippled its use as though it had been sent out of town. You now enter a dreary cell-looking precinct, and if you enter it in Shoe-lane, your very limbs are in danger all the way through to Farringdon-street. It is a dark, dark, dismal hole, not even light enough for a criminal prison. Pray recommend them to put lights into the roof, and open the place to Farringdon-street wide. It ought, from its position, to be of as much use as Lendenhall or Newgate.—**JOHNNY.**

DONCASTER WATERWORKS, &c.—At a meeting of the Local Board of Health on Wednesday week, it was resolved "that the plan of Messrs. Nicholson and Tonn, so far as the service pipes and tanks, be agreed to (previous to transmission to the General Board of Health for approval), but that the power of the present wheel be tested" before further adoption. A letter from Mr. Trapp, of Manchester, was presented, but not read, in which the board was strongly dissuaded from taking their water from the river Don, into which the drainage from Rotherham, Sheffield, Chesterfield, and other places was disembogued before the water reached Doncaster. He recommended a minor stream called the "Beck" or "Great Ings," about five miles on the road to York, as a preferable source. Mr. Milner, a member of the board, offered his gratuitous services as surveyor to carry out their local Act.

DRURY-LANE THEATRE.—Mr. Marsh Nelson has been appointed architect to the theatre, in the room of the late Mr. Beasley.

TENDERS

Delivered 12th instant for the erection of the Blombery Rectory and Wash-house. Messrs. P. F. Bury and G. Ponsall, architects. The quantities taken out by Mr. W. Wright and Mr. C. Balcan.

| | | |
|------------------------|---------|-------|
| Jewell | £11,134 | £2165 |
| Ricks | 10,800 | 255 |
| Carter | 9,488 | 165 |
| Little | 9,732 | 160 |
| Fleming | 9,600 | 230 |
| Higley | 9,440 | 180 |
| Coleman | 9,349 | 150 |
| Reeding | 9,239 | 230 |
| Piper | 9,194 | 300 |
| Randers and Woolton | 9,180 | 196 |
| Holmes | 9,097 | |
| Macedon | 8,985 | 180 |
| Potter | 8,930 | 115 |
| Myers | 8,507 | 165 |
| Locke and Neesham | 8,106 | 277 |
| Curtis | 8,102 | 402 |
| Cropper | 7,948 | 148 |
| Scussions and Robinson | 7,732 | 222 |

The second amounts were for enameling the inside of the first-class bath.

TO CORRESPONDENTS.

"*Petter and Puges v. Rempton.*"—Mr. Petter asserts that his name should stand prominently in the report of trial than is done. The most useful note with Mr. Petter. "*Editorial Note.*"—Perhaps some of your intelligent readers will be good enough to give a rub by which I may arrive at the best proportion for a retaining-wall of brickwork, and the better proper to be given per foot. We will suppose the bank to be supported by a mass of ground, and 16 feet perpendicular.—**A. A.**

"*J. E. v. W. R.*" (no longer in time to call).—"*B. E.*" "*W. D. P.*" "*J. T. A. W.*" (requests us to forward him a plan of a tile and brick kiln, which he wishes to erect, and liberally enclose a postage-stamp. We cannot do it at the present). "*A. Schreiber*" (Bristol). "*W. M.*" "*W. G. R.*" "*R. K.*" "*J. W. R.*" "*Rev. G. B. J.*" "*J. W. A.*" (call on the Editor). "*M. E.*" "*A. Schreiber*" (Chichester). "*J. H. P.*" "*J. M.*" (we shall pay a visit). "*W. N.*" "*A. S.
